Overview

About Wevio

Wevio’s mission is to empower emerging businesses to achieve global success.

At Wevio, WE are a team, and WE work together to deliver excellence. WE work closely with clients to help them achieve their goals. WE believe that businesses must now embrace a global vision (VIO) in order to truly succeed. The global vision and resulting strategy is what will separate successful companies from average ones.

WE and VIO together form Wevio, a Strategic Business Development Consulting Company that is dedicated to empowering emerging businesses to achieve global success.

Vision

“A company providing everyone around the world with a global mission to generate value and continue growing for the next 100 years”

To enable companies to be successful in global markets, Wevio will act as a partner who will help your business achieve global results. Be it from finding foreign buyers to exporting products, Wevio will create the strategies necessary for setting up a strong marketing infrastructure.

Company
Refers to the fact that Wevio is a company looking to contribute to society and national interests, while achieving profits and building value.

Global
The ‘W’ and ‘E’ in Wevio stand for ‘West’ and ‘East’ that encompasses the entire world.

Generate Value
Combining ‘WE’ and ‘VIO’ refers to the creation of real value.

Everyone
The WE in Wevio does not target anyone in particular but refers to everybody.

Global Mission
The ‘VIO’ in Wevio is an abbreviation of Vision, and refers to the company’s positive embrace of everything in its vision instead of following a particular notion.

100 years
100 years of time to provide stable growth and continuity while preserving history and tradition.
CEO Message

"It is my mission to build a company to last 100 years that presents an invaluable vision for humanity."

To be successful in global markets, Wevio will act as a partner who can help your business achieve global results. Be it from finding foreign buyers to exporting products by creating the strategies necessary for setting up a strong marketing infrastructure.

Core Values

Wevio always abides by strong values of business

To achieve Wevio’s vision, the following three values have been selected as the company’s core values and behavioral principles to achieve corporate objectives.

Globalization in Mind

Moving towards the world and consider everyone as a customer.

Business with a Vision

A business must have a vision and must generate profits.

Continuous Business Growth

Looking beyond Wevio’s descendants and also from the present to the future when making management decisions.
In order to promote businesses globally, Wevio has professional teams in the US, Korea, and India, which have helped many companies achieve their objectives beyond their expectations.

The strategic planning department, the business development department, trading department and management support office all play a significant role in this.
Wealth of Wevio Resources

Wevio's assets

Wevio is a global business specialist backed by years of experience that can provide the required support to make your global business successful. Wevio is the perfect partner with the appropriate skills and resources to ensure that.

Global Network
Global Reach through a huge network spanning over 140 countries around the world including the US, Korea, and India.

Global Reference
Experience and technical know-how acquired from diverse global business experience gathered locally and abroad since 1998.

Global Human Resources
Specialized manpower in diverse fields from the US, Korea, and India.

The Sun Never Sets
The knowhow necessary to keep a business running 24 hours a day with offices in multiple time zones around the world.
Wevio is?

A specialist in helping your business to succeed globally

A global business development enterprise recognized as a successful partner by more than 3000 companies in New York, based on experience and technical knowhow, gained from leading diverse global projects since 1998.

50  The number of countries that Wevio has partnered with for global business

over 150  The number of global partners who Wevio have closely connected to

over 3000  The number of global business projects that Wevio has successfully accomplished
Wevio has **helped over 3000 companies** to achieve many of their goals in global business activities, starting from New York in 1998.

This includes having a network of **over 150 partners spread across 15 countries** to help customers for their globalization needs.

Based on the experience of conducting business with governments and agencies from many countries, Wevio possess’ **a high level of understanding of government projects** and understand agencies working processes.

Wevio can **provide customized solutions for the business environment** of companies, consumers, and the government.

Application platform depending on business promotion stages

Support global business strategy by suggesting a marketing strategy that utilizes the global business creative network (GBCN) depending on the stage of business promotion.

Stage-based strategies based on global business competitiveness

Detailed market research necessary for entry into global markets, competitive edge analysis, provision of basic data for strategies based on demand analysis, analyzing the condition and status of the required infrastructure for publicity in the global market and to use those results to create an internet site based on web standards, foreign-language catalogs, production and provision of foreign-language publicity videos, etc.

Stage-based establishment of the global business creation platform

Publicity, operational support, and localization for target markets based on gradual stage-based establishment focusing on competitive edge. This provides the establishment of a global strategy, the most efficient platform to penetrate the market, support for registration on the B2B/B2C marketplace, participation in international exchanges and exhibitions, conducting discovery and matching between companies and buyers respectively.

Stage-based global network business promotion

Foundation of exports developed by the stages and platforms that stem from a competitive edge. Providing discovery of demand and trade consulting services as a practical and realistic way to increase exports. The continuous provision of business consulting services to maximize the global business scale.
Success Stories
Through the GBCN Platform

Many companies and government agencies have utilized the global business creative network platform and have been able to globalize their businesses while increasing exports.

Pioneer in U.S. aftermarket for car components
- Direct export strategy to the American aftermarket industry for technologically advanced Korean car accessory manufacturers
- Certified as replacement accessories for American cars (see APA certification, 17 trillion won market size) to secure a foothold and enter the American market
- International strategic coordination between Korea (car accessory and parts manufacturer, automotive parts research support center, Wevio) + America (CAPA, American insurance companies, and American medical society).

Improving performance and finding buyers for marine equipment manufacturers
- Pioneering a strategy to find a possible entry into overseas markets appropriate for a small to medium size Korean shipbuilder by conducting global market research
- International joint venture strategy with a medium size Korean shipbuilding company (design capability, advanced technology, core technologies, manufacturing capability and workforce) + Southeast Asia (Philippines, Indonesia, Bangladesh, India, and other countries with demand for medium size ships)
- International joint venture strategy with a medium size Korean shipbuilding company (design capability, advanced technology, core technologies, manufacturing capability and workforce) + Southeast Asia (Philippines, Indonesia, Bangladesh, India, and other countries with demand for medium size ships) concluded an LOI for US$5.37 million as part of a stage-based contract worth US$10 million
- The Bangladeshi company is currently performing on-site due diligence in Korea

Made in Korea Strategy-based business
- Strategy for entering overseas markets utilizing international potential position
- Made in Korea brand strategy (in spite of product and technological competitiveness and the presence of market distribution channels, there is often a prejudice against made in China or other national brands leading to the adoption of a Korea labeling business by marginal businesses)
- Investment promotion for each city and area as well as coordination with companies (currently raising up to US$60 million in investment)
Over 150 Partners in 15 countries

Wevio has a number of clients and organizations as partners with customized global marketing solutions.
Government and Chamber Partnerships

The Shipbuilding industry is growing quickly, and Wevio has a proven history of helping companies through expert consultancy solutions.

The Pharmaceutical industry has been booming, and Wevio has helped a number of clients achieve their global market entry and sales goals.

INDUSTRY SPECIALIZATIONS

AUTOMOTIVE

SHIPBUILDING

PHARMA
Wevio has successfully helped many wholesale and retail clients build their consumer or B2B brands and market & distribute their products globally.

Through providing engineering and technical advisory services in such energy sectors as wind and solar, Wevio has built a history of success.

Wevio has significant experience in providing services for ICT & Telecom clients, from business foundation to commercialization to global promotion.

The Games & Content industries are among the fastest growing, and Wevio has the proven ability to deliver your experiences to consumers worldwide.

Wevio is a recognized leader in helping emerging Medical Device companies expand their reach globally.
Automobile Industry Overview

The automotive industry is continuously booming in terms of revenue, global market, technology and after sales service. However, it is not clear how the technology will change in the coming years. Automakers and suppliers no longer have the luxury of waiting for this change to happen. There is a always a scope of new technology and innovation for automakers which require huge investments and effort.

The growth and profit centers for automotive OEMs are gradually shifting to emerging markets. In order to stay profitable and competitive, automotive manufacturers and suppliers need to address the key challenges including rising product complexity, strict environment and safety regulations.

**Global Opportunities**

- Small cars show big potential in emerging markets

**Global Challenges**

- Expanded regulatory requirements
- Shifts in consumer demand
- Increased electronics and software content
- Complexity and cost pressure
- Diverging markets

**Keys Initiatives Required for Global Markets**

- Continuous Markets Research
- Building a Global Brand
- Adopting appropriate Production strategies
- Identifying Global Partners
- Global Standardization
- Building and Maintaining a wide Distribution Network
- Customer Satisfaction and managing Changes in Demand
Automobile Industry Services

The Automotive Industry is one of the major industries where Wevio is working to promote global market entry & sales. Wevio works with various companies and industry associations to establish corporate relationships and enhance R&D support between countries. As representatives for CAPA (Certified Auto Part Association), NATRIP, ARAI, NSF, etc., Wevio specializes in the Asian market.

Wevio specialists in global delegation development and global standardization through the certification program. Additionally, there are various auto part distribution companies such as LKQ that sell aftermarket products from Asian manufacturers.

Shipbuilding Industry Overview

The shipbuilding industry is responsible for the design and construction of oceangoing vessels all around the world. The construction and modification of ships and these operations are carried out in specialized facilities called shipyards. The industry builds ships for commercial as well as military purposes. Most of the global ship production is concentrated in Asian countries such as China, Japan and South Korea though large shipyards, which also exist in many other countries. The shipbuilding market is segmented on the basis of ship type: Bulkers, Tankers, Containers, LPG & LNG and other special vessels.

The major players in the industry, Hyundai Heavy Industries, Samsung Heavy Industries, Daewoo Shipbuilding and Marine Engineering (DSME) and Mitsubishi Heavy Industries are being profiled. Many SME’s established to support the key players such as supplying parts.

Global Opportunities

According the recent market report, “Shipbuilding Industry Set to Pick up After 2017”. Many Asia-Pacific nations have rapidly developing ports, improving infrastructure, low-cost communications and access to potential new customers via valuable shipping trade routes. This places them in a strong position for growth.

Small ship demand growth is expected to average 1.5% p.a. in 2015-16, per average historical growth trends...

In total, contracts for an average of 1,003 small ships per annum are expected to be placed in 2017-20, followed by an average of 1,031 p.a. in 2021-24.

Global Challenges

- Global Economy
- Total offshore vessel demand prospects
- Competitiveness factors
- Policies issues related to shipbuilding and the offshore industry
- Main industry challenges: technical, tabor and costing issues

Keys Initiatives Required for Global Markets

- Continues Markets Research
- Global Tenders and Bidding Process
- Adapt New Production strategies
- Finding Global Customer through Government Level Delegations
- Global Environmental and Safety Issues
- New Trends and Developments Of Industry
- Finding New Markets Globally
Shipbuilding Services

Wevio has worked with clients on shipbuilding projects across the world and provided consultancy solutions by scrutinizing project viability and feasibility, design, project management, supervision and post project assistance. In addition, the company helped in yard selections, contract negotiations, planning approvals, delivery acceptances and guarantee claim managements.

Recently Wevio was involved with the Bangladesh Navy to help them build several ships and vessels. With vast experience in technology transfer from one country to other, Wevio was able to achieve massive success through this project and throughout the globe. Additionally, the services that are provided has helped many companies and organizations achieve incredible growth, while solving issues in cost management, time management, work management, technology and other key fields.

Pharmaceutical Industry Business Overview

2015 was a big year for deals in the life sciences sector, with EY reporting that M&A activity reached a record high of $462.2 billion. This represented a 44 percent increase from the previous year, when there was only $319.5 billion in deals. Deal volume also increased, this time by 21.5%, with 768 deals being completed in the past year to date.

2016 is set to have solid activity in M&A, although it seems unlikely that the industry will sustain this rapidly acceleration of deal volume. The top 500 biotech and pharmaceutical companies are expected to experience $17 billion in sales losses in 2016. In 2017, this figure will jump to $21 billion.

Challenging future for biotech

- High risk of R&D Cost
- Politicians impact regulations and price
- Government approvals
- Patent registrations and protection
- Patent cliff
- Economic uncertainty
- Complexity of biopharma supply chain and operations
- Quality compliance and regulatory scrutiny

Figure 2: Global biotech market estimate

As part of the Global Business Foundation and Promotion Stages, Wevio is providing services related to ICT for global business expansion, this is to help SME’s with various ICT services right from the global business content creation to digital marketing, sales and support.

**Wevio’s services include following.**

Wholesale & Retail Industry Business Overview

The world retailing industry is becoming increasingly competitive, forcing companies to take an innovative approach to attract consumers and encourage long-term loyalty to the customers. Department stores, for example, are increasing consumer footfalls by replacing more expensive brand-name products with less expensive private-label products. There are many market segments that are fueling the growth of this industry. The convenience store industry and the global e-commerce industry are all expected to grow significantly in the next few years especially in emerging markets such as Latin America, the Middle East and Asia.

The wholesale distribution industry looks much as it did in previous decades. Distributors are focused on improving profitability, expanding their margins, and outmaneuvering the competition. However, new technologies, changing market dynamics, and increasingly demanding customers have fundamentally reshaped the way today’s distributors do business.

Global Challenges

• Improving the understanding of customer profitability
• A more consolidated and competitive market
• Expansion into online channels
• Dramatic increases in speed of sales
• Analytics to be able to react faster to market changes
• Complex wholesale relationships and legal issues
• Overseas product regulations, IP and patent issues
• New market entry strategy
• Building effective branding for products
• Order processing, shipping and logistics as per import regulations of buyer’s country.

Renewable Energy Industry
Business Overview

The renewable energy industry remains one of the most vibrant, fast-changing, and transformative sectors of the global economy. Technology improvements, cost declines, and the catalytic influence of new financing structures, have turned the sector into a driver of economic growth – both in the United States and around the world. Global clean energy investment, including renewable energy, totaled more than $329 billion in 2015. Because the cost of most renewable energy technologies continued its downward trend, the world’s investment supported an unprecedented deployment of new renewable energy projects despite the availability of extremely cheap fossil fuels.

The industry is segmented by geographies, products, technologies, application, services, and various other submarkets across the value chain including, generation, transmission and distribution, utility services, infrastructure construction and maintenance, and others. It is further segmented as conventional and non-conventional under generation and by different levels of voltage under transmission and distribution.

Global Opportunities

- China: 102.9 billion USD
- Europe: 47.6 billion USD
- Asia and Oceania (excluding China and India): 46.1 billion USD
- United States: 42.8 billion USD
- Americas (excluding U.S. and Brazil): 32.3 billion USD
- Middle East and Africa: 10.2 billion USD
- India: 7.3 billion USD
- Brazil: 7.3 billion USD

Global Challenges

- Local Government Renewable Energy Policies
- Local Partners Search for Joint Venture of Projects
- Changing Innovation
- ROI and Competitive Analysis

Keys Initiatives Industry for Global Markets

- Growing global consensus that the world must deal with the threat of climate change.
- Continues to grow steadily and show no sign of slowing down. Meeting the world’s growing need for energy will require more than $48 trillion in investment in energy supply to 2035.
- Government Initiatives
- Waste Market Size and necessary alternative for other energy sources
- The global renewable energy share can reach and exceed 30% by 2030
Renewable Energy Industry Services

Wevio is one of the leading environmental & renewable energy global consultancy companies, providing top engineering solutions and technical advisory services in various energy sectors such as wind and solar projects. The company has the capacity to deliver fast solutions at every phase of a project, from the initial stage, project feasibility and design, and finally guiding throughout the project management of the construction phase and operations. The main customer base are usually governments and investors.

Telecommunications Industry
Business Overview

The Telecommunication industry has seen huge growth in the last 10 years as there are new technologies and devices to come and simplify communication for consumer markets, residential and corporate operations. There are hundreds of players and competitors in the market which mostly rely heavily on price to tap their market share. Over this period, operators have expanded their service portfolios and overhauled their price plans to meet explosive demands of households. On the other hand, the corporate market of telecommunication remains the industry’s favorite and concerned mostly about the quality and reliability.

The continuous technical transformation and information waves have driven high growth in the telecom industry. The industry itself is, however, facing many problems. The top disruptions that will drive the most change in telecommunications by 2020 are: Integration with content service providers, mobility, market saturation and security. In terms of investment and returns, companies should have a proper business strategy to overcome concerns like heavy investments, market share, price and quality of service.

Challenges

• Marketing, Sales & Distribution
• Competitive Rivalry
• Economic Uncertainty
• Quality Compliance and Security
• Availability of Substitutes Options
• High Fixed Costs Investments
• Segment Based Marketing Strategy
• Challenges in the digital Era
• Mobile Internet and big data
Telecommunications Services

Wevio serves telecommunications companies around the world, helping them to better understand their customers, build superior networks, find a sustainable path to growth and achieve cost leadership while maintaining a high-performance organization.
